

Lightsabers

Lightsabers should be **combat ready**, able to securely hold the blade style of choice of the Temple, and not easily break during choreography.

Please see your LCC and LD for suggestions on what saber brands are and are not acceptable as there are a lot on the market.

Jedi colors include various shades of the following: **Blue, Green, Purple, Yellow, Amber.**

Pink is not an acceptable shade of **purple**, however.

Black is restricted to the Dark Saber and not allowed for either side.

Silver/White are not permitted for Jedi and should be used only for canon characters that wield them (Ahsoka, Imperial Knights).

Red and **Blood Orange** are the only colors approved for **Sith** unless a canon character wields another color (Revan). These colors are not allowed for Jedi.

Additional details such as leather or cloth wraps, o-rings, may be added to the saber if it keeps the Star Wars universe aesthetic.

Lightsabers may also have Jedi Order or Sith Sun symbols etched onto them.

Any other requested design should be cleared through the Global Costume Consulars, though some designs such as animals and creatures will not be permitted. Imperial Cogs should only be added to characters working as Inquisitors for the Empire.
